

DESI "FRUTAS DALTÓNICAS"

December 8th, 2008

PRESS RELEASE

The number 13 not always was considered to be a carrier of bad luck. For the Romans, 13 was a harmonic and decorative number. In fact, Julio César was in the habit of saying that 13 was his number of good luck, since it was thanks to the Thirteenth Legion with which reached the power and the glory. Glory for that we wait is granted to us after sweetening the ears of our listeners with this refreshing mixture of flavors and colors.

Our new artist is called Desi and has the pleasure of introducing the last release of our netlabel. "Frutas Daltónicas" is called this excellent work where we taste Techno sounds and pads adjusted of darker environments. All this accompanied of an exquisite cocktail of shades and fruity textures.

Desi is a young producer from Alcoy, started his musical experiences at the age of 17, when joining with a friend, they began to produce some tracks. Later he started playing records and taking the music more serious. Since then it has passed five years, several and small clubs and millions of bassdrums listened. He and his friends decided to form a collective "Fucktor". With this release it is consolidated a bit more in the national scene and presents his credentials as bet of future.

We hope that you enjoy this new work full of illusion. Meanwhile, we are already preparing the following release. Our first album made exclusively by remixes, Supersonic Girls come back!
